

Assignment:1

Peripherals Theory

- ❖ Task (1): Create a table listing 3 types of printers, 2 types of scanners, and 2 types of webcams, and for each, write one real-life use case (for example: 'Inkjet printer – printing college assignments').

Ans:

Types of Printer:

SR No.	Types	Real-Life Use Case
1.	Inkjet Printer	Printing college assignments and color photos.
2.	Laser Printer	Printing office documents quickly in large quantities.
3.	Dot Matrix Printer	Printing invoices and multi-copy bills in banks or warehouses.

Types of Scanner:

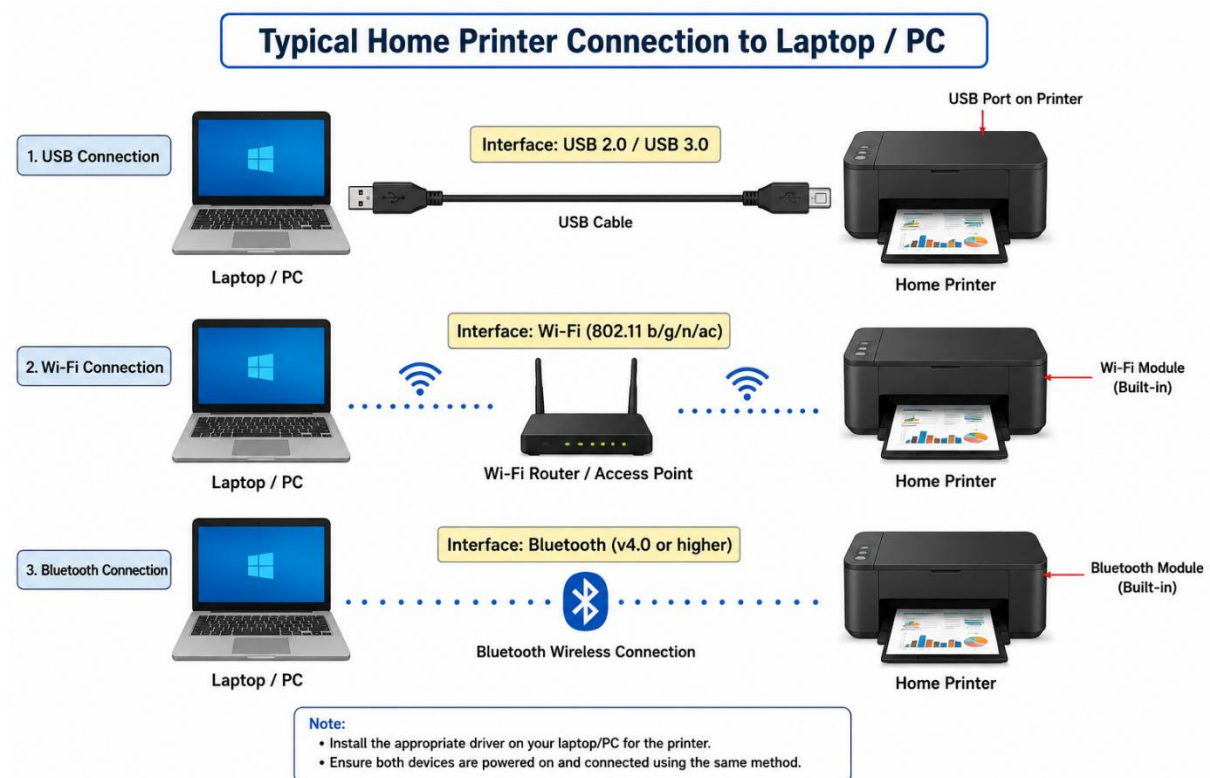

SR No.	Types	Real-Life Use Case
1.	Flatbed Scanner	Scanning certificates, photographs, and documents.
2.	Sheet-fed Scanner	Digitizing multiple pages of office paperwork quickly.

Types of Webcams:

SR No.	Types	Real-Life Use Case
1.	Built-in Webcam	Attending online classes or video meetings on a laptop.
2.	External USB Webcam	Live streaming, online interviews, or high-quality video conferencing.

- ❖ **Task (2): Draw a labelled diagram showing how a typical home printer connects to a laptop or PC, including the connection interface used (USB, Wi-Fi, or Bluetooth).**

Ans:

- ❖ **Task(3):** List three different connection interfaces (such as USB, Wi-Fi, Bluetooth) used by peripherals like printers, scanners, and webcams, and for each, name one advantage and one disadvantage. Hint: Think about speed, convenience, and compatibility.

Ans.

(1) USB:

- **Used By:** Printers, Scanners, Webcams
- **Advantage:** Fast and stable connection with high data transfer speed.
- **Disadvantage:** Requires a cable and limited by cable length.

(2) Wi-Fi:

- **Used By:** Printers, Scanners

- **Advantage:** Wireless connection allows multiple devices to connect from anywhere on the same network.
- **Disadvantage:** Connection may be slower or interrupted if the Wi-Fi signal is weak.

(3) Bluetooth:

- **Used By:** Printers, Webcams
- **Advantage:** Easy wireless connection without needing a router.
- **Disadvantage:** Short range and generally slower than USB or Wi-Fi.

- ❖ **Task (4): Pick any one device you use at home or college (printer, scanner, or webcam). Write step-by-step instructions for how you would connect it to your computer, including what cable or wireless method you would use and any setup steps required.**

Ans:

- ❖ **Device Chosen: Printer (Wi-Fi Connection):**

- 1. Turn on the printer.**
 - Plug the printer into a power outlet and press the Power button.
- 2. Connect the printer to Wi-Fi.**
 - Open the printer's Settings or Network menu.
 - Select your Wi-Fi network (SSID).
 - Enter the Wi-Fi password and connect.

3. Turn on Wi-Fi on the computer.

- Make sure the computer is connected to the same Wi-Fi network as the printer.

4. Add the printer to the computer.

- **Windows:** Open Settings → Bluetooth & devices → Printers & scanners → Add device.
- Select the printer from the list and click Add device.

5. Install the printer driver (if required).

- Windows may install the driver automatically.
- If not, install the driver from the printer's installation CD or download it from the manufacturer's website.

6. Print a test page.

- Open any document.
 - Select Print and choose your printer.
 - Print a test page to confirm the printer is working correctly.
-
